Triangular Number

By Lambert M. Surhone

Betascript Publishers Feb 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - High Quality Content by WIKIPEDIA articles! A triangular number is the number of dots in an equilateral triangle evenly filled with dots. For example, three dots can be arranged in a triangle; thus three is a triangle number. The n th triangle number is the number of dots in a triangle with n dots on a side. The rightmost term in the formula, consisting of the two numbers $n + 1$ and 2 on top of each other within parentheses, is the standard mathematical notation for a binomial coefficient that counts the number of distinct pairs to be selected from $n + 1$ objects. In this form the triangular number T_n solves the 'handshake problem' of counting the number of handshakes if each person in a room full of $n + 1$ total people shakes hands once with each other person. 108 pp. Englisch.
